

8K60Hz Display Port Switcher for Easy Operation and High-Performance DP 1.4 Switching

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Stone
- Certification: RoHS
- Model Number: DP Switch Splitter
- Minimum Order Quantity: 500 Pcs
- Price: \$9.60/pieces 100-499 pieces

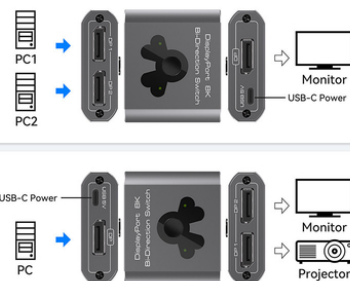

Product Specification

- Private Mold: NO
- Product Name: DP Switcher 8K 2x1 DP Switch Splitter
- Interface: DP Interface
- Gender: Female-Female
- Input: 2 DP Input
- Output: 1DP Output
- Color: Grey
- Function: Switch
- Warranty: 12 Months
- MOQ: 100pcs
- Highlight: 8K60Hz Display Port Switcher, Easy Operation Display Port Switcher, DP 1.4 Switching Display Port Switcher

DisplayPort Bi-Direction Switch

2 in 1 Out / 1 in 2 Out

Note: DP1 and DP2 only support one input or output! One-click quick switching.

Product Description

Product Description

8K60Hz Display Port Switcher for Easy Operation and High-Performance DP 1.4 Switching

About this item

[Stable Performance] Made of fine manufacturing materials and upgraded high-performance chip, and can be perfectly compatible with your TV, monitor, laptop, PC, projector, etc. which will bring you a wonderful audio-visual experience.

[Ultra High Definition Resolution] This display port switch supports resolutions up to 8K@60HZ, 4K@144HZ and HD audio. The highest resolution and refresh rate you can get depends on your hardware devices such as source devices, monitors and DP cables. If you want to use 8K@60Hz resolution, please make sure that your hardware devices support 8K, otherwise you may experience flickering or black screen (it is recommended that the length of the 1.4DP cable connecting the device to the switcher does not exceed 3m).

[Easy Operation] Connect two sources to the displayport switcher, and with the buttons on the DP switcher, you can switch to select one of the DP sources to be output to the monitor, thus controlling two sources at the same time. Plug and play, no need for other drivers or software, one-button switching. Note: The switcher can only transmit in one direction (2 in 1 out) and requires the supplied USB power cable to power the switcher.

[High-Speed Transmission] The dp 1.4 switcher provides a bandwidth of up to 32.4Gbps, which improves signal transmission efficiency and ensures stable transmission of audio and video in high definition and perfect synchronisation of sound and image.

[Aluminium Housing] The monitor switcher is made of aluminium metal casing, which is lightweight, durable, quick to dissipate heat, easy to carry and flexible to place.
