Transform Your Workspace with a USB C Hub for Fast Data Transfer and Multiple Device Connection

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Your Brand
- Certification: CE,FCC
- Model Number: P9R
- Minimum Order Quantity: 1000
- Packaging Details: Brown paper box
- Delivery Time: 25 days
- Payment Terms: T/T
- Supply Ability: 20000/month

Product Specification

- Material: Alloy
- Color: Silver
- Port: HDMI, USB A 2.0 /3.0, Network, SD/TF
- Transfer Speed: 10GB

Product Description

Driver-free design, plug and play

This Docking Station (USB-C Hub) features an advanced driver-free design. Users don't need to install any additional software or drivers. Simply connect the device to your computer via the USB-C port, and it's instantly recognized and ready to use. Whether running Windows, Mac OS, or Linux, it offers a stable plug-and-play experience, significantly improving work and entertainment efficiency. For users who frequently travel or need to quickly switch between devices, this design eliminates the need for tedious installation steps, ensuring immediate use right out of the box, saving time and effort.

Product Specifications at a Glance

The following table lists the core specifications of this Docking Station to help you quickly understand its configuration and performance:

Parameter Item	Detailed Description
Interface Type	USB-C 3.2 host control port
Video Output	HDMI supports up to 4K resolution
USB Ports	3 USB-A ports, 2 USB-C ports
Network Port	RJ45 Gigabit Ethernet
Storage Expansion	Supports USB flash drives, external hard drives, SD/TF cards
Power Input	PD 3.0 supports up to 100W fast charging
Compatible Systems	Windows / macOS / Linux / iPadOS
Material	Aluminum alloy housing for excellent heat dissipation
Dimensions	Approximately 137*62.9*33.8mm, portable design

HDMI High-Definition Video Output

The Docking Station is equipped with a high-performance HDMI 2.1 port that supports up to 8K Ultra HD output and is backward compatible with various resolutions, including 4K and 1080p. Whether expanding dual monitors for everyday office work or engaging in professional image processing and video editing, it delivers clear, smooth visuals. For users who need high-resolution presentations, gaming, or video playback, the HDMI output instantly transforms your laptop into a multi-screen workstation.

External Storage Support

In addition to standard port expansion, this USB-C Hub supports a variety of external storage devices, including USB flash drives, external hard drives, solid-state drives, and SD/TF cards. Users can easily transfer and back up data between devices, meeting everyday file-sharing and large-capacity storage needs. For designers, photographers, and videographers, the Docking Station's high-speed transfer channels enable fast import and export of footage, improving work efficiency.

Simultaneous Multi-Device Connection

This product supports simultaneous use of multiple ports, allowing you to connect a keyboard, mouse, monitor, printer, external hard drive, and other peripherals simultaneously, achieving a single-line connection for an efficient work and entertainment environment. The USB-C Hub's design allows your laptop to easily transform into a full-featured workstation with just one port, significantly reducing the hassle of frequent plugging and unplugging, keeping your desktop tidy. Whether in the office, conference room, or home entertainment environment, the Docking Station can provide a stable and efficient multitasking experience.
