

13-Port USB C Hub with 65W DC Power Adapter 10Gbps Data Transfer and 100W PD Charging for MacBook Laptop

Basic Information

- Place of Origin: CHINA
- Brand Name: SUBOSEN
- Certification: CE FCC ROHS
- Model Number: C1
- Minimum Order Quantity: 300
- Price: 40USDT
- Packaging Details: COMPLETE
- Delivery Time: 25
- Payment Terms: T/T
- Supply Ability: 300/DAYS/25

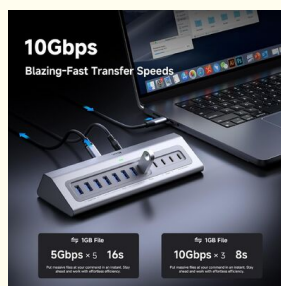

Product Specification

- Highlight: 65W DC Power Adapter USB C Hub, 10Gbps Data Transfer USB C Hub, 100W PD Charging USB C Hub

Product Description

Header: Upgrade Your Workspace with All-in-One Powered USB C Docking Station

Tired of insufficient laptop ports, slow data transfer, and low-power hubs that crash when you plug multiple devices at once? Our 13-port powered USB-C hub solves all your desktop needs with an independent 65W DC power supply, high-speed 10Gbps data transmission, and multi-port PD fast charging, designed for heavy daily office & creative work.

1. Independent 65W DC External Power – Run All Ports Simultaneously

Unlike unpowered hubs limited by your laptop's battery, this dock comes with a dedicated 65W DC power adapter to supply stable power to every single port. You can connect external SSDs, flash drives, cooling fans, phones, tablets all at the same time without lag, disconnection or slow charging.

DC Input: 65W (20V/3.25A) full-load power supply

100W PD 3.0 host charging port: Fully power your MacBook/Windows laptop while working

2. Dual-Speed Data Transfer: 10Gbps Super Fast File Copy

Built with mixed-speed USB ports to match your different usage demands:

1× 10Gbps USB-A + 2×10Gbps USB-C: Transfer large 4K video, RAW photos, big game files in seconds, compatible with USB 3.2 Gen2 SSD & flash drives

6× 5Gbps USB-A ports: For daily peripherals – mouse, keyboard, U disk, printer, webcam

Important Note: All USB-C ports on this hub support ONLY data transfer and charging, NO video signal output (No HDMI/DP display function).

3. Multi-Port PD Fast Charging for Phones & Small Devices

2 extra USB-C PD output ports built on the front for your mobile gadgets:

Max 20W charging per single port; Up to 45W power output when only one charging port is occupied

Charge your iPhone, Android phone, AirPods, power bank together without occupying your laptop's native USB-C port.

4. Premium All-Aluminum CNC Machined Housing

We adopt one-piece integrated aluminum shell with precise CNC cutting process, smooth matte finish, scratch & wear resistant. The metal body delivers excellent heat dissipation, keeping the hub cool even under 24-hour long-time heavy use. Minimalist trapezoid shape perfectly matches your desk setup, great for home office, studio, business travel.

5. Wide Compatibility

Fully compatible with all USB-C laptops with data & PD charging function:

MacBook Pro/Air, iPad Pro, XPS, HP Spectre, ThinkPad, Samsung Galaxy Book, Chromebook and more Windows/Mac OS laptops.

Plug & play, no extra driver installation required.
